

ALFIDO TECH

Frontend Development Internship

Task 4 – Clone the UI of a real-world website using HTML, CSS, and JS.

Project Name : YouTube Layout

Submitted By: Kashish Saini

Submission Date: 01 July 2026

Project Description

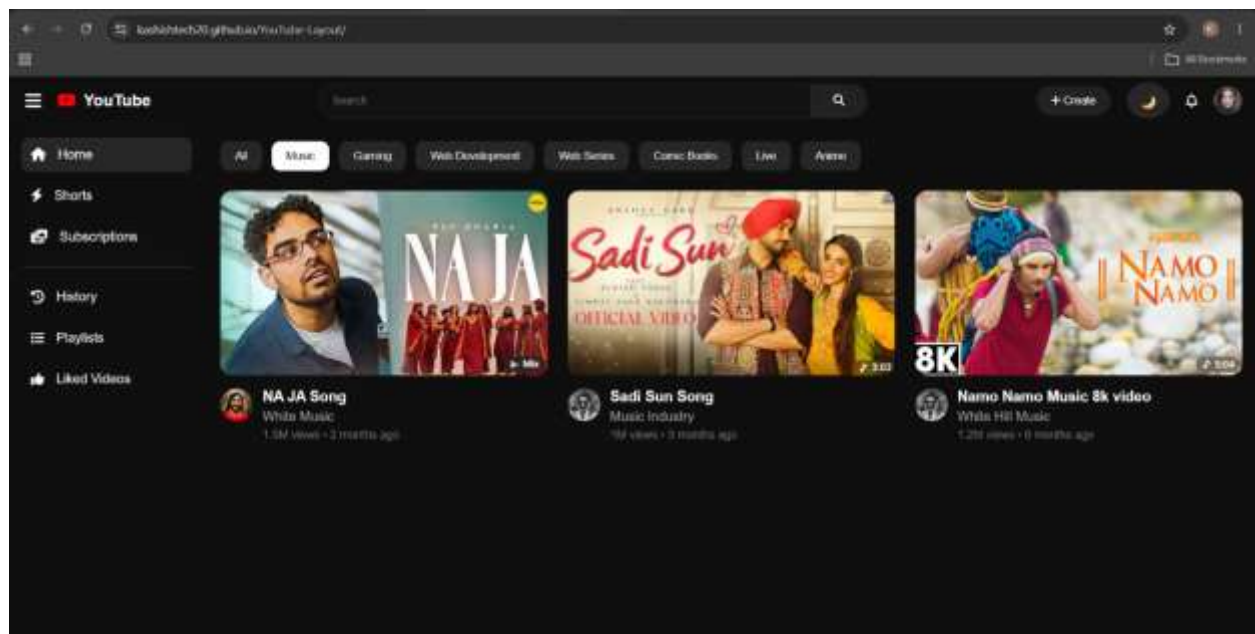

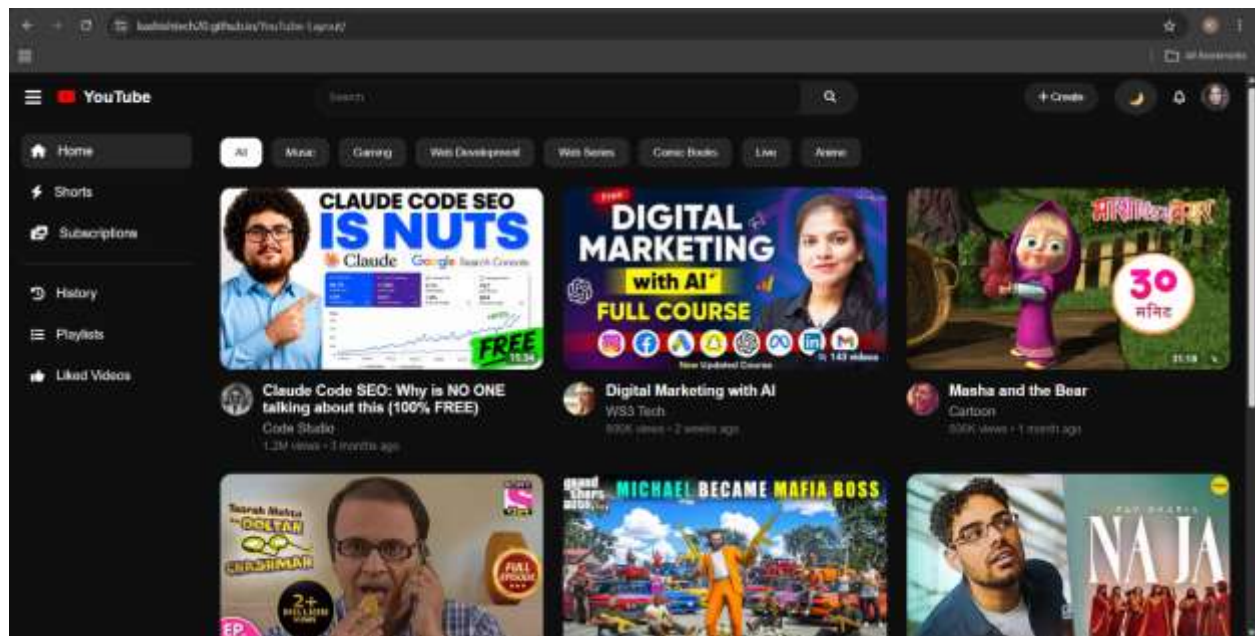

The YouTube Layout project is a responsive frontend application developed using **HTML, CSS, and JavaScript**. The project recreates the user interface of YouTube by implementing a modern navigation bar, sidebar, video cards, category filters, and responsive layout. It focuses on building an attractive and user-friendly interface while improving frontend development skills.

Technologies Used

- HTML5
- CSS3
- JavaScript (ES6)

Features

- Responsive YouTube-inspired interface
- Sidebar Toggle Menu
- Video Cards Layout
- Category Filter Buttons
- Interactive User Interface
- Mobile-Friendly Design
- Modern UI with Hover Effects

Code Snippets

HTML

```
<header class="navbar">
```

```
<div class="left-nav">

  <i class="fa-solid fa-bars menu"></i>

  <div class="logo">

    <i class="fa-brands fa-youtube"></i>

    <span>YouTube</span>

  </div>

</div>

<div class="search-box">

  <input type="text" placeholder="Search">

  <button>

    <i class="fa-solid fa-magnifying-glass"></i>

  </button>

</div>

</header>
```

CSS

```
.video-grid{

  display:grid;

  grid-template-columns:repeat(3,1fr);

  gap:25px;

}

.video-card{

  cursor:pointer;

  transition:.3s;
```

```
}
```

```
.video-card:hover{  
    transform:scale(1.02);  
}
```

JAVASCRIPT

```
const menuBtn = document.querySelector(".menu");  
const sidebar = document.querySelector(".sidebar");  
const content = document.querySelector(".content");  
menuBtn.addEventListener("click", () => {  
    sidebar.classList.toggle("hide-sidebar");  
    if(content){  
        content.classList.toggle("expand-content");  
    }  
});
```

Conclusion

The **YouTube Layout** project successfully recreates the interface of a popular video streaming platform using HTML, CSS, and JavaScript. It demonstrates responsive web design, modern UI development, and interactive frontend functionality, strengthening practical skills in building professional web interfaces.
